Application/Process

Product

In case of a density measurement (e.g. g/cm³, SG):

Density min/max	Unit (if other, please specify)	normal	min.	max.
Density	g/cm ³ <input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Product operating temperature	°C <input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Do you know the chemical formula? <input type="text"/>				
Accuracy	Unit (if other, please specify)			
<input type="text"/>	% <input type="text"/>			

In case of concentration measurement (e.g. %):

Concentration (composits of 2 products)

Name of product 1 (i.e. carrier liquid)	<input type="text"/>			
	Unit (if other, please specify)	normal	min.	max.
Density of product 1	g/cm ³ <input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Name of product 2 (i.e. solids)	<input type="text"/>			
	Unit (if other, please specify)	normal	min.	max.
Density of product 2	g/cm ³ <input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
	Unit (if other, please specify)	normal	min.	max.
Concentration (product 2 in product 1)	% <input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Do you know the chemical formula? <input type="text"/>				
Accuracy	Unit (if other, please specify)			
<input type="text"/>	% <input type="text"/>			

Pipe Specification

	Thickness		Material	Density g/cm ³
	<input type="checkbox"/> mm	<input type="checkbox"/> inch		
Inner diameter (d)	<input type="text"/>			
Pipe wall	<input type="text"/>		<input type="text"/>	<input type="text"/>
Liner wall	<input type="text"/>		<input type="text"/>	<input type="text"/>
Insulation wall	<input type="text"/>		<input type="text"/>	<input type="text"/>
Others	<input type="text"/>		<input type="text"/>	<input type="text"/>

Measuring not on a pipe (e.g. vessel, tank or chute)
Please attach drawing of the geometry, wall thickness and dimensions.

Instrumentation

		min.	max.	Unit (if other, please specify)
Ambient temperature at measuring point		<input type="text"/>	<input type="text"/>	°C <input type="text"/>
Power supply	<input type="radio"/> 90-250V AC/DC	<input type="radio"/> 24V AC/DC		
Exproof requested	<input type="radio"/> No <input type="radio"/> Yes	Type	<input type="text"/>	
Process signal:	<input type="radio"/> 4 ... 20 mA	<input type="radio"/> HART	<input type="radio"/> FF	<input type="radio"/> PA
Functional safety:	<input type="radio"/> none	<input type="radio"/> SIL 2	<input type="radio"/> SIL 3	

Retrofit (with existing source)

Original source date

Original source activity Unit (if other, please specify) mCi

Type of isotope

Supplier of source

Comments / Special Requirements

The products that Berthold Technologies offers are custom engineered systems. There are multiple family models and component options that are able to be selected based on the customer's process parameters. Also nuclear source sizes are calculated and selected for each individual system. These inputs are necessary to engineer a system that will meet the required needs and will function properly. Inaccuracies or omissions of the inputs could have a negative effect on the operation of the measurement. Berthold cannot be held accountable for the performance of their equipment if initial specifications were falsified or not presented fully.
